Quiz Instructions

It's time to check your knowledge! Use this quiz to create a custom study guide. Note any answers that were marked incorrect, so you can study the relevant material and try this quiz again.

If you don't know the answer to a question, please do not guess. Instead, select "I don't know". It's OK not to know everything and to admit when we're unsure.

Check the [Active Record Validations docs](https://guides.rubyonrails.org/active_record_validations_docs) (https://guides.rubyonrails.org/active_record_validations.html) if you need help!

Question 2

1 pts

At what point in time in a model's lifecycle do validations run?

- ☐ Before an existing record is deleted from the database
- ☐ When an existing record is found in the database
- ☐ Before a new record is saved to the database
- ☐ Before a new instance of the model is created
- ☐ Before an existing record in the database is updated
